

Strangely

by Binder

Strangely, this puzzle (on the surface) gives old-timey notes. It's a vehicle for conflict, combining a sign of activity with the sign of peace. A master in the habit of book-keeping may at heart be speechless, gutted. In this case, after fluid, lighter parts ... this "brigade" is missing even parts for bones. At first, standard crossword elements need elucidating, such as 2D displays.

But you see, such a fine trellis with no middle bars - it's open, constant, and club shaped. Digest time, visibility, and labels in the middle (as I need head to make good night, briefly) - they contain seeds of change in estate. In the end, although the format's ambiguous, hope this works (from one crossword-y author).
